WARNING

Do not proceed with the installation until you have read the entire instructions, including these warnings. (Use of materials or methods not authorized by Solatube International will result in an invalid warranty.)

Solatube International, Inc. (seller) assumes no responsibility or obligation whatsoever for the failure of an architect, contractor, installer, or building owner to comply with all applicable laws, ordinances, building codes, electrical codes, energy codes, fire and safety codes and requirements, roof warranties and adequate safety precautions. Installation of this product should be attempted only by individuals skilled in the use of the tools and equipment necessary for installation. Protect yourself and all persons and property during installation. If you have any doubt concerning your competence or expertise, consult a qualified expert before proceeding.

Install at your own risk!

Solatube product installations may be dangerous and include the potential for death, personal injury and property damage. The hazardous conditions include but are not limited to the following:

- Use extreme caution when working around the roof opening to prevent falling and personal injury.
- The weight of skylights varies, therefore transportation and installation of the skylight to the installation location should be conducted with as many people as necessary to avoid accidents. Ensure proper lifting techniques are used at all times.
- Solatube products may have sharp edges. Always wear leather or canvas gloves while handling and installing products.
- Solatube product installations require climbing and working at dangerous heights, including on ladders, scaffolding, roofs and in attic spaces. Risk of death, personal injury and property damage may result from a fall, or from falling objects. Use extreme caution to minimize risk of accidental injury, including, but not limited to the following procedures:
  - Clear area below your work space of all people, animals and other items.
  - Avoid working on surfaces that are slippery or wet.
  - Use foot-wear with excellent traction.
  - Use only strong, well supported ladders.
  - Work only in calm dry weather.
  - If attic work is necessary, ensure that your weight is supported at all times with structurally sound framing; drywall material is not designed to carry a person’s weight.
- To reduce the risk of fire, electric shock, and personal injury, basic safety precautions should always be followed when using electric tools, including always wearing safety goggles or other suitable eye protection, and ensuring work area is clear of all electrical wires, gas pipes, water pipes, and other obstacles.
- When working in the attic or other dusty areas, use of a mask or respirator is recommended to avoid lung irritation. Attic spaces may be dark, confined, and subject to extreme temperatures. Beware of sharp protruding objects. Do not attempt installation without having someone within range of your voice or close enough to come to your aid if necessary.
- Solatube products are not designed to withstand the weight of a person, tools or other objects. Walking or placing objects on the system could cause personal injury and property damage. If the product is damaged, the structural capacity may be weakened; therefore the system should be repaired immediately. For safe installation and use, do not deviate from these installation instructions.
- Please note that interior surfaces and finishes in older homes may have been painted with lead-based paint. Removal of the skylight could disrupt the paint. Use proper precautions to minimize the exposure of dust and debris when removing and installing skylights. For more information of proper removal of lead paint please visit www.epa.gov/lead.
- Ensure roof curb and water proofing is in good condition before installing skylights. If curb and or water proofing is compromised, it will be necessary to repair or replace. All roof work and repairs should be conducted by individuals skilled in roofing practices or a licensed roofer.
Solatube HSE Fixed Skylight Installation Instructions
The following steps are for installation of a Solatube HSE Fixed Skylight.

See page 8 for Solatube HSE Operable Skylight Installation Instruction.

1. Remove Existing Skylight and Inspect
   - Inspect curb and flashing for damage and debris.

   Remove existing skylight

   Clean area and roofing material around roof curb.

   NOTE: Plan a safe route to bring the skylight onto the roof and to the curb.
**Apply New Seal to Top Edge of Roof Curb**

**Caution:** The weight of skylights varies, therefore transportation and installation of the skylight to the installation location should be conducted with as many people as necessary, or utilize lift assisting tools such as hoists to avoid accidents. Ensure proper lifting techniques are used at all times.

**Return to The Ground Floor to Retrieve the Skylight**

Use glass suction cup to secure and carry skylight to roof. Ensure suction cup is rated appropriately for weight of skylight.

**Place suction cup on top 1/3 portion of skylight**

**NOTE:** Pump handle on suction cup until red line is no longer showing. Failure to do so could cause the suction cup to fail and release from the skylight.

**Caution:** The weight of skylights varies, therefore transportation and installation of the skylight to the installation location should be conducted with as many people as necessary, or utilize lift assisting tools such as hoists to avoid accidents. Ensure proper lifting techniques are used at all times.
4 Return to Roof and Place Skylight Onto Curb

NOTE: Clean inside glass surface prior to placing onto curb.

5 Adjust Skylight Position and Fasten to Curb

Adjust skylight and center inside frame to drywall.

Use snap spacers as necessary to center skylight to internal drywall. Use multiple spacers for larger gaps between sash and curb. Apply pressure to top of skylight and fasten to curb.

Continue to apply pressure to top of skylight and fasten to curb with remaining fasteners.

Clean glass surface when fastened.
Now you can enjoy the benefits of your Solatube HSE Skylight and the high performance, natural lighting it provides.
The following steps are for installation of a Solatube HSE Operable Skylight.

1. **Remove Existing Skylight**
   - Inspect curb and flashing for damage and debris. Clean all debris from curb and roof area around skylight opening.
   - Apply new seal to top edge of roof curb.

2. **Remove All Packaging from Operable Base and Lay Out All Components**
   - a.
   - b.
   - c.

For the most current Installation Instructions, please visit www.solatube.com/instructions
Check Operation of Solar Motor Prior to Assembly

Connect solar panel cable to motor cable

Snap cables together

Remove plastic battery protector

Press the “UP” button to lift the chain

Press the “DOWN” button to bring the chain back to the home position. If motor does not operate, see pairing section on page 21.

NOTE: If motor does not operate see pairing instruction on page 21.
4. Assemble the Sash
   Use caution to not flex the plastic corners
   a. Insert one side of sash into the other
   b. Ensure corners snap together
   c. Continue assembling remaining sash sides

5. Place PVC Base into Sash Frame
   Ensure to keep cords inside of frame
   a. Insert one side of sash into the other
   b. Ensure there is no gap between PVC base and frame.
   c. Continue assembling remaining sash sides
   d. Ensure corners snap together
   e. Continue assembling remaining sash sides
6 Fasten PVC Base to Sash Frame

- **Screw #8 x 1/2" black**

7 Attach Solar Panel to Chain Side of Operable Base Assembly

- **Align the solar panel bracket to the top edge of the sash**

  - **Tighten screws on each side of solar panel to secure correct panel angle for maximum sun exposure.**
Place Operable Base Assembly on Curb and Align Inside Edges with Drywall Shaft.

Use the safest method to carry the operable base assembly to the roof.

Fasten Operable Base Assembly to Curb
Use snap spacers to center the operable base assembly to the internal drywall. Use multiple spacers for larger gaps between sash and curb.

Insert snap spacer(s) between fastening hole and curb.

Press down on top of operable base assembly and fasten to curb. Continue fastening all sides of operable base assembly to curb.

Leave base [lower end with solar panel] for next step.
10 Connect Solar Panel Wire to Motor Wire and Attach Rain Sensor

11 Tuck Wires Under Sash and Install Remaining Two (2) Fasteners

12 Lift Hinges to Prepare for Operable Top Installation

13 Return to Ground Floor and Remove all Packaging from Fixed Skylight Portion

14 Locate Dimples on Fixed Skylight Top and Drill Hinge Holes

Locate dimple location for hinge holes on opposite end and drill the remaining three hinge holes.
15. Locate Dimples on Opposite Side (Opposite side of hinge holes) of Fixed Skylight Top and Drill Chain Connector Holes

16. Use Chain Connector to Scrape All Debris from the Backside of the Holes Drilled. NOTE: Debris Must be Removed for Chain Connector to be Properly Attached.
17 Use Chain Connector to Scrape All Debris from the Backside of the Hinge Holes Drilled.

Place chain connector assembly onto PVC and align with drilled holes.

Ensure rivet gun is flush against sash and rivet head is protruding through chain connector.

18 Fasten Chain Connector Assembly to the Metal Sash

Use rivet gun and provided rivets to fasten chain connector:

- Squeeze rivet gun handle to fasten.
- Continue with second rivet.
19 Drill Through First Layer of PVC and Fasten with Rivets
Caution: Drill through first layer of PVC only to prevent damage

- Use #30 drill bit
- Ensure rivet gun is flush

20 Clean the Inside Glass and PVC Frame
Remove all debris

- a
- b
21. Take Fixed Skylight Top to Roof and Place on Operable Base.

Use the safest method to carry the fixed base assembly to the roof.

- Place suction cup on top glass section of fixed top assembly.
- Pump suction cup until red line is no longer showing.

22. Align Sash with Hinge to Ensure Rivet Holes are in Alignment and Fasten

Ensure sash and hinge are flush with no gaps before fastening.

- Use rivet gun to fasten hinge to sash
23 Fasten Opposite Hinge to Sash
Ensure sash and hinge are flush with no gaps before fastening.

24 Use the Remote to Open the Skylight and Connect Pin

a) Press the “UP” button on the remote
b) Hold the skylight and guide it as it opens as chain is not pinned yet
c) Ensure chain head is in proper location once skylight is fully opened.
d) Insert clevis pin
e) Ensure pin is completely engaged
25. Press “DOWN” Button on Remote to Close Skylight

26. Remove Suction Cup
   Press button to release suction. Pull suction cup off.

27. Clean Glass and Frame

28. Installation Complete
   You can now enjoy the benefits of your Solatube HSE Operable Skylight
   and the high performance, natural daylight it provides.
Optional Step
These instructions are intended to be used to pair multiple Solatube HSE Operable Skylights to one remote control, or pair a new remote.

1. Ensure the Motor and Solar Panel for the Desired Skylight to Pair are Connected.

2. Remove Motor Cover, Pairing Chip. Remove Battery Protector from Remote

   a. Motor cover
   b. Pairing chip
   c. Remove plastic battery protector

Optional Step
These instructions are intended to be used to pair multiple Solatube HSE Operable Skylights to one remote control, or pair a new remote.
Optional Step—Continued
These instructions are intended to be used to pair multiple Solatube HSE Operable Skylights to one remote control, or pair a new remote.

3. Ensure the Motor and Solar Panel for the Desired Skylight to Pair are Connected.

- Press the “UP” and “CENTER” buttons together and hold until the display reads “95”.
- Next, press the “CENTER” button to start the 12 second countdown.
- Set remote down and press the “P” button on the pairing chip to pair remote with motor during the 12 second countdown.
- The green light will illuminate and stop the countdown. Once paired, the green light and remote display light will turn off to indicate successful pairing.
Optional Step—Continued
These instructions are intended to be used to pair multiple Solatube HSE Operable Skylights to one remote control or pair a new remote.

4 Adjust Chain if Necessary for Chain to Function Properly

5 Test for Successful Pairing

Press the “UP” button

Chain will raise

Press the “DOWN” button. Chain will go down.

Pairing Complete

For further Remote Control instructions please see the Solatube Remote Control User Manual.
