At the 2018 International Green Building Conference, experts spoke about the changing face of the workplace and how human health and wellness are driving innovation in construction and building management. This article includes: “Greening the Office with Biophilic Features.” Find out more: 5 Ways Green Buildings are Good for Your Health

A 2004 University of Pittsburgh study showed that patients with access to sunlight required 20% less pain medication, leading to lower medical costs. Find out more: Healthy and Green with LEED for Healthcare

Daylight delivers significant benefits, both physical and mental:
• Boost the immune system: Vitamin D is essential to the immune system, and can provide a boost so that you can fight off disease more effectively.
• Lower resting heart rate: Studies suggest that sunlight can help lower your pulse rate, improving cardiovascular health.
• Reduce stress: You can bring down your stress level with the help of proper exposure to sunlight. Taking some time to enjoy the sun can help you sleep better as you decrease your stress level.
